

ASTHMA SENSE

Smart asthma inhaler, capable of detecting air quality
Embrace the future of asthma care!

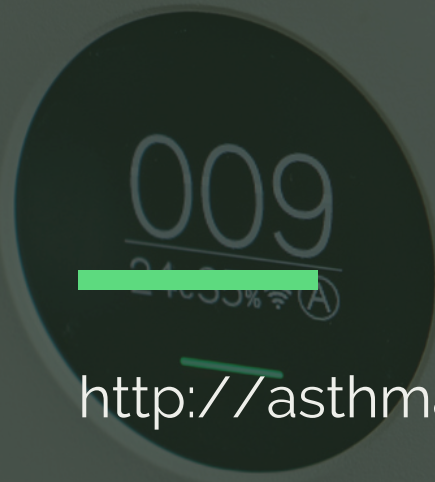

AsthmaSense is a smart asthma inhaler designed to provide advanced monitoring and analysis of air quality for individuals with asthma. It is an innovative device that combines cutting-edge technology with features to offer a comprehensive solution for asthma management.

KEY FEATURES OF ASTHMASENSE:

- Recording and reporting the number of sprays per use.
- Analyzing the air inside the lungs before and after use.
- Utilizing IoT technology to communicate with smart devices.
- Presenting reports in textual, numerical, and graphical forms.
- Integrating gas sensors to detect the presence of toxic gases.
